ABOUT ME

Dedicated and growth-oriented BS Artificial Intelligence student with hands-on experience in Python programming and web development fundamentals. Strong foundation in problem-solving and logical thinking, developed through consistent coding practice and project building over the past 2+ years. Currently focused on full-stack web development and practical machine learning, with a commitment to building real-world solutions and continuously improving technical skills.

INTEREST

Programming

Gaming

SPORTS

badminton

Table tennis

TECHNICAL SKILLS

Web dev

python automation

UI/UX Design

Version control

problem solver

EXPERIENCE

No formal industry experience yet. However, bring 2+ years of consistent self-driven coding experience, with a strong focus on:

- Building logic
- Writing functional programs
- Learning by doing (project-based approach)
