 Portfolio: *(Add your link here)*

Professional Summary

Dedicated and growth-oriented BS Artificial Intelligence student with hands-on experience in Python programming and web development fundamentals. Strong foundation in problem-solving and logical thinking, developed through consistent coding practice and project building over the past 2+ years.

Currently focused on full-stack web development and practical machine learning, with a commitment to building real-world solutions and continuously improving technical skills.

Technical Skills

- Programming: Python (Intermediate)
- Web Development: HTML, CSS (currently learning Full Stack)
- Core Strengths: Problem Solving, Logical Thinking, Debugging
- Tools & Platforms: Git, GitHub, VS Code

- Learning Focus: Machine Learning (theory + hands-on practice)
 - AI Tools (basic usage)
 - Algorithms (basic understanding)
-

Education

BS Artificial Intelligence (*In Progress*)

Federal Urdu University (FUUAST)

FSc / ICS (Computer Science + Physics)

Punjab College (Quaid Campus) RWP

Marks: 850

Matriculation (Science – Biology)

Allied School Fatima Jinnah Campus, Islamabad– Federal Board

Marks: 952 / 1100

Projects

- ◆ Python-Based Projects (Core Programming)
 - Designed and developed multiple Python applications mostly CLI based focusing on logic building, control data structures, and problem-solving techniques
 - Strengthened understanding of core concepts including loops, functions, Exceptions and data handling
 - Practiced writing clean and structured code for maintainability

- ◆ **Learning Projects (Web + ML)**

- Built foundational frontend web pages using HTML and CSS, focusing on layout, structure, and responsive design basics
- Currently exploring machine learning concepts with practical implementation, including basic data handling and model understanding

- ◆ **Continuous Development**

- Actively working on improving project quality by transitioning from basic scripts to real-world inspired applications
- Regularly updating and managing code on GitHub for version control and progress tracking .Daily learn new things.

Experience

No formal industry experience yet.

However, bring 2+ years of consistent self-driven coding experience, with a strong focus on:

- Building logic
- Writing functional programs
- Learning by doing (project-based approach)

Relevant Focus Areas

- Artificial Intelligence Fundamentals
- Programming & Software Development
- Web Development (Full Stack – In Progress)

- Machine Learning (Practical Learning Phase)
 - AI TOOLS & Usage
-

Additional Information

- Strong motivation to grow in the tech industry
- Fast learner with a problem-solving mindset
- Interested in building real-world applications using AI and web technologies
